EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. An obvious error regarding the dependency of Claims 7, 8 and 11 have been corrected to reflect dependency upon Claim 1 instead of canceled Claim 6.
3. Claim 13 has been rewritten to reflect the original format of this claim showing the separation of the various clauses.

13 (original) A reflective structure comprising:

a base, and;

a reflective means formed on said base,

wherein said base comprises:

a supporting member provided with a first fundamental surface having portions differing in their height, a second fundamental surface having portions differing in their height, a third fundamental surface having portions differing in their height;

a first undulating portion formed on said supporting member,

a second undulating portion formed on said supporting member, and;

a third undulating portion formed on said supporting member,

wherein said first and second fundamental surfaces are arranged in a first fundamental surface direction at a first fundamental surface pitch of a plurality of

fundamental surface pitch, said first fundamental surface pitch being the smallest of said plurality of fundamental surface pitches,

wherein said first and third fundamental surfaces are arranged in a second fundamental surface direction at a second fundamental surface pitch of said plurality of fundamental surface pitch, said second fundamental surface pitch being equal to said first fundamental surface pitch or being the smallest next to said first fundamental surface pitch,

wherein said first and second undulating portions are arranged in a first undulating portion direction at a first undulating portion pitch of a plurality of undulating portion pitch, said first undulating portion pitch being the smallest of said plurality of undulating portion pitch,

wherein said first and third undulating portions are arranged in a second undulating portion direction at a second undulating portion pitch of said plurality of undulating portion pitch, said second undulating portion pitch being equal to said first undulating portion pitch or the smallest next to said first undulating portion pitch,

and wherein at least one of said first and second undulating portion directions are different from said first and second fundamental surface directions.

4. The title has been amended to be more descriptive of the invention as follows: "Reflective structure and an image display device having first, second and third fundamental surfaces formed on a supporting structure and having differing height portions".

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance: None of the prior art of record, nor uncovered to date shows or discloses, *inter alia*, a third fundamental surface having portions differing in their height, wherein the base comprises a third undulating portion, formed on said supporting member, having a third recess or projection associated with said first recess or projection, wherein said first and third fundamental surfaces are arranged in a second direction at a second fundamental surface pitch, wherein said first and third undulating portions are arranged in said second direction at a second undulating portion pitch, and wherein a larger pitch of said second undulating portion pitch and said second fundamental surface pitch is a non-integral multiple of a smaller pitch of said second undulating portion pitch and second fundamental surface pitch" (Amended Claim 1). Moreover, none show, *inter alia*, wherein said first and second undulating portions are arranged in a first undulating portion direction at a first undulating portion pitch of a plurality of undulating portion pitch, said first undulating portion pitch being the smallest of said plurality of undulating portion pitch, wherein said first and third undulating portions are arranged in a second undulating portion direction at a first undulating portion pitch of a plurality of undulating portion pitch, said second undulating portion pitch being equal to said first undulating portion pitch or the smallest next to said first undulating portion pitch, and wherein at least one of said first and second undulating portion directions are different from first and second fundamental surface directions (Claim 13).

6. It is agreed that Yoshi (US 7,321,407) and Sasagawa et al. (US 2001/0035927) applied in the last Office Action no longer anticipates or renders obvious the limitations of these claims as amended. As such, these claims are deemed allowable as presently advised.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
